

BLUESKIES SOLUTIONS^{LLC}

Innovations for Resource Management

Esri ArcGIS II: Essential Workflows (v10.1)
Vocational Training and Resource Center
Juneau, Alaska
January 23-25, 2013

For ArcGIS version 10.1

With the migration to version 10 of ArcGIS, ESRI no longer provides instructor-led training within Alaska. Blue Skies Solutions, LLC is 1 of only 2 providers of instructor-led Authorized ArcGIS Training for version 10 within Alaska.

In addition, with the release of ArcGIS 10.1, Esri has reorganized the training classes with new materials and exercises to emphasize the growth in demand for managing GIS data with the intent of publishing on the Internet via a web application using tools such as ArcGIS Server.

Esri ArcGIS II: Essential Workflows (for ArcGIS version 10.1)

(24 instruction hours)

This Esri Certified* course will familiarize students with the fundamental skills needed to author, share, and use geographic information and maps across the ArcGIS system. You will learn how to efficiently find, explore, manage, and analyze geographic data and create informative maps that showcase your work. The course covers a variety of techniques to effectively share GIS maps and resources with decision makers, stakeholders, and the public. It is designed for GIS professionals and others who have an introductory-level knowledge of GIS concepts and limited ArcGIS experience, but is also a great refresher for GIS users at all levels. After completing the course, you will be able to use ArcGIS software and content to create high-quality maps that combine data from different sources. You will also learn to organize, create, and edit geographic data so that it is accurate and up to date. And finally, you will learn to deliver maps and analysis results to multiple platforms so they are accessible to other ArcGIS users and to non-GIS users.

Students will receive an Esri certificate of completion for "ArcGIS II: Essential Workflows".

* Esri is the industry leader in providing GIS software solutions and GIS education. They have developed a curriculum, using their software products that is widely utilized across the industry and may only be taught by Esri or Esri Certified Trainers.

About GIS Training Provided by Blue Skies Solutions, LLC

Since 2003 Blue Skies Solutions has instructed Alaska GIS professionals at all experience levels in the use of Esri GIS software. We have been certified by Esri to teach their ArcGIS I and II courses for ArcGIS version 10.1, and the Esri Desktop I / II / II courses for ArcGIS version 10.0 We also instruct users on the challenges of utilizing GIS within the state of Alaska. Our instructor, Michael Knapp, has over 17 years of GIS, GPS, and remote sensing application experience and is a certified GIS Professional (GISP). In 2010, he became a Certified Technical Trainer (CTT+) through CompTIA. The CTT+ certification evaluates instructor skills in class preparation, presentation, communication, facilitation and evaluation.

ArcGIS 10.1 Training Announcement

Blue Skies is an Alaskan company specializing in the application of GIS & database technology for natural resource managers.

We believe that a solid foundation in GIS, database, and web programming skills is an invaluable tool for professionals who regularly use, modify, and convey location information associated with environmental, real estate, and utility data.

The right combination of training and exposure to the available GIS data resources in Alaska can be a critical step in effective communication between professionals.
